ICE GEAR CATALOG

The Otter® Advantage

4 S's of Superiority

Shelter

Otter® ThermalTec™

Only the patent pending Otter ThermalTec™ Layering System has all the benefits of a full thermal shell without the trade offs of excessive frost and light transfer through sewing and weld lines.

Otter's unique layering system allows the inner and outer layers to function independently. The outer shell has minimal exterior seaming providing outstanding wind and light blocking capabilities. While the full thermal quilted inner layer in combination with the floating thick outer shell provides higher lofting, locking in heat and virtually eliminating condensation.

Sled

100% RotoMolded

The ultimate in durability with seamless surfaces and uniform wall thickness. One-piece Polyethylene Construction for the strongest, most reliable and the optimum in cold weather performance. Perfect attack angle for conquering snow, slush and rugged terrain. Easily add an optional Otter Sled Tow Hitch to the reinforced molded-in hitch pockets.

Structure

Square Tube Aluminum Frame

Durable long-lasting strength, oversized square tube aluminum frame, for the ultimate in framing structure. Tested and proven stronger than round frames, Otter's square tubing frame is the strongest on ice. The Ultra-Glide system features nylon inserts for ultra smooth set-up and take-down operation.

Seating

Ergonomic

Featuring either deluxe padded bucket or bench seats. Otter leads the way in the most comfortable and ergonomic seating on the market. All Otter seating is top mounted for maximum storage capacity.

Tougher. Stronger. Smarter.

Dual Molded-In Power Rails

All Otter Trailers feature Dual Molded-In Power Rails for the ultimate in strength and durability. Two Aluminum I-Beam Rails are molded directly into the trailer body during the manufacturing process to serve as the anchor point for the trailer bed. No drilling holes in the polyethylene body and relying on a bolt and washer to secure your load. Otter frames bolt directly to the Power Rails providing the highest level of strength and performance.
